CLEAN LASER TECHNOLOGIES

In-House Financing That Moves Your Business Forward

Get the Equipment You Need. Preserve Your Working Capital.

Clean Laser Technologies offers in-house financing to qualified businesses purchasing our laser cleaning equipment. Because you are working directly with the manufacturer, our financing process is designed around the equipment, your business, and your ability to make a meaningful investment in its success.

Our goal is to help qualified business owners acquire revenue-producing laser cleaning equipment without requiring the entire purchase price upfront.

Financing Highlights

- Available exclusively to qualified businesses
- Financing terms of up to **36 months**
- A sizeable down payment is required
- **$250 application fee**
- Business owner must sign a personal guaranty
- Financing is limited to qualifying Clean Laser Technologies laser cleaning machines and additional machine parts
- Available for both established businesses and newly formed businesses, subject to approval

The Benefits of Financing Directly With the Manufacturer

A Practical Approval Process

Traditional lenders may not fully understand laser cleaning equipment or its income-producing potential. We manufacture, sell, service, and support these machines, so we understand the equipment and the industries it serves.

Our financing decisions may consider the complete transaction, including:

- The amount of the down payment
- The business owner’s qualifications and financial strength
- The intended commercial use of the machine
- The equipment being purchased
- The proposed financing term
- The applicant’s ability to make the required payments

All financing is subject to application review and approval.

Preserve Working Capital

A sizeable down payment demonstrates your commitment while financing the remaining balance allows you to retain more working capital for expenses such as:

- Business operations
- Insurance and licensing
- Advertising and customer acquisition
- Transportation and mobile equipment
- Safety equipment
- Employee or operator expenses

Flexible Terms of Up to 36 Months

Qualified applicants may receive financing terms of up to 36 months. The approved term, down payment, interest rate, and monthly payment will depend on the applicant and the specific equipment purchase.

Shorter terms may reduce the total financing cost, while longer terms may provide a lower monthly payment.

Work Directly With Clean Laser Technologies

Your equipment purchase, financing, training, warranty support, replacement parts, and technical assistance all come from the same company. This gives you direct access to the people who build and support your laser cleaning machine.

Clean Laser Technologies offers:

- American-built laser cleaning systems
- Manufacturer-direct technical support
- Operator and laser safety training
- Equipment service and replacement parts
- A standard two-year warranty
- Lifetime technical support

What Can Be Financed?

Our in-house financing is specifically intended for the purchase of qualifying Clean Laser Technologies equipment, including:

- Laser cleaning machines
- Additional machine components and parts included in the approved purchase

Business Purchase Required

Our financing program is available only for commercial business purchases. We do not offer personal or consumer financing.

If you do not currently have a business, you must establish a legal business entity before financing documents can be completed. Formation of a business does not guarantee financing approval.

The business will be the purchaser and borrower. The owner, or other approved principal, must also personally guarantee the financial obligations of the business.

Personal Guaranty Required

A personal guarantee is required from the business owner or approved principal. This means the guarantor accepts personal responsibility for the financing obligation if the business does not make the required payments.

Applicants should carefully review all financing documents and understand their responsibilities before signing.

How the Application Process Works

1. Choose Your Equipment

Speak with Clean Laser Technologies to determine which laser cleaning machine is appropriate for your business and intended applications.

2. Submit Your Application

Complete the business financing application and pay the $250 application fee.

3. Provide Supporting Information

Additional business, ownership, identification, banking, credit, or financial documentation may be required.

4. Application Review

We will evaluate the proposed down payment, requested term, equipment purchase, business information, guarantor information, and overall ability to repay.

5. Review Your Financing Offer

Approved applicants will receive the proposed down payment, interest rate, payment schedule, financing term, and other applicable conditions.

6. Sign the Agreements and Submit the Down Payment

Financing and personal-guaranty documents must be signed before the equipment order can be finalized.

7. Equipment Production and Training

Once all requirements have been satisfied, your machine will be scheduled for production, delivery or pickup, and applicable training.

Important Financing Disclosure

Financing is available only to qualified business applicants and is subject to credit review, underwriting, equipment eligibility, documentation, and final approval. A sizable down payment and personal guarantee are required. Maximum financing term is 36 months. Rates, payments, down-payment requirements, and other conditions vary by applicant and transaction. Submission of an application and payment of the application fee do not guarantee approval. Financing availability may be limited by applicable laws and the applicant's state of formation or operation. This information is provided for general informational purposes and is not a commitment to lend.
